

CIFA Vista: Data Driving Efficiency

The digital platform for maximum productivity and efficiency in day-to-day fleet management

In the construction industry, where operational efficiency, service continuity, and cost control are increasingly strategic priorities, the ability to quickly access machine data represents a tangible competitive advantage.

To meet these needs, CIFA provides its customers with **CIFA Vista**, the cloud-based platform developed to remotely monitor and manage entire fleets, offering simple and immediate access to key operational and diagnostic information.

Accessible from any connected device, CIFA Vista enables users to view real-time data such as GPS location, operating hours, fuel consumption, productivity, pumped cubic meters, fuel usage, and kilometers traveled, as well as the overall health status of the machines. In addition, thanks to the **GeoLeash** feature, truck movements can be monitored to help prevent theft.

The system is designed to help fleet managers, site supervisors, and operators make faster, more informed decisions while also planning maintenance activities based on predictive data.

Greater Control, Less Downtime

One of the platform's key advantages is the ability to continuously monitor machine performance and receive diagnostic information that helps identify potential issues at an early stage. This proactive approach makes it possible to intervene before a problem leads to machine downtime, reducing idle time, improving service planning, and lowering operating costs.

Scheduled maintenance also becomes easier to manage thanks to the ability to monitor actual equipment usage and plan interventions based on real-time operational data and predictive analysis.

A Platform to Improve Performance

Beyond operational monitoring, CIFA Vista provides advanced analytics tools that allow users to generate reports, compare parameters, and track machine performance over time.

Informazioni su CIFA

CIFA è un produttore di macchinari e attrezzature per il calcestruzzo, leader nel mercato italiano e uno dei principali attori a livello globale. Parte del gruppo industriale cinese Zoomlion dal 2008, CIFA è un'azienda altamente internazionale con reti di vendita e supporto in tutti i continenti e in grado di offrire ai clienti non solo una gamma di prodotti affidabili e di qualità, ma anche un supporto finanziario tramite Zoomlion Capital Financial Services. Per ulteriori informazioni, consultare il sito web all'indirizzo www.cifa.com

Through intuitive dashboards and dynamic charts, users can transform machine-generated data into valuable insights to optimize processes, reduce consumption, improve productivity, and analyze performance over customizable timeframes.

Practical Support for Customers and Service Teams

The sharing of information between customers, the service network, and CIFA enables faster and more effective support management, improving diagnostic capabilities and reducing the time required to identify and resolve potential issues.

Thanks to worldwide data coverage and hardware installed directly at the factory, CIFA Vista supports CIFA machines operating across the globe every day, providing users with a complete overview of their fleet and helping make operations more efficient.
