### **Dimensions**

### **Characteristics**

MANTIS is a tracked unit for spraying concrete ideal for underground works or areas difficult to reach. Equipped with a powerful crawler carrier, MANTIS is the best means to move in rugged and irregular work sites with total autonomy of movement. It can work either with the diesel engine or with the electric motor. This dual operation mode allows it to work even in areas with scarce power supply.

Thanks to the sturdy telescopic boom with 4 sections, long reach and compact design, MANTIS can be used either for dry or wet shotcrete. Two wide side doors make every component accessible for fast maintenance and control operations. The perfect addition to MANTIS are RHINO stationary concrete pumps.
