

INTERMAT 2024, CIFA will showcase the evolution of the concrete mixer-pump: 50 years since its invention, it is now electric.

In Paris, CIFA will highlight its role to the construction industry's decarbonization journey with its electric Energya MK28E, alongside its top-selling model: K36L-5.

Milan - February 12, 2024 | CIFA, a 95-year old leading manufacturer of concrete machinery, is proud to announce its participation in the 2024 edition of **INTERMAT Paris**. As the construction sector grapples with monumental **environmental, economic, and social challenges**, Intermat has redefined itself as a platform for sector-wide collaboration towards building a collective low-carbon path. **CIFA fully embraces this vision** and is committed to contributing **innovative and sustainable solutions** to the construction industry. The theme of the 2024 Intermat edition resonates deeply with CIFA's core values and objectives. CIFA recognizes the importance of collaboration among equipment manufacturers, energy suppliers, and construction companies in meeting the industry's evolving needs.

At Intermat 2024, CIFA will showcase a range of **cutting-edge concrete machinery aimed at addressing the challenges** facing the construction sector. These challenges encompass not only environmental concerns but also social aspects, such as the **shortage of skilled operators**, ensuring **on-site safety**, and enhancing **equipment durability**.

This year holds special significance for CIFA as it celebrates the 50th anniversary of the invention of the first mixer-pump. Introduced in 1974, it has remained at the forefront of concrete pumping technology, embodying CIFA's legacy of innovation and excellence.

CIFA will also present the new **K36L-5** - where "36" stands for the length of the boom, "L" for *Steeltech* line (the most customizable and highest-quality line in the product range) and "5" for the number of boom sections. This new **"5 arms like never before"** is a **unique pump in the 30-40 meter segment**, thanks to its **unbelievably smart boom** with 360° rotation on last arm, it is engineered to work in smart spaces with the most safety electronic functions.

In the following, a preview of what you'll see at Intermat:

- **Energya MK28E**, the electric mixer-pump
- **MK25H**, the lightness of carbon fiber and the mobility of a mixer-pump
- **K36L-5**, the top-selling truck-mounted pump
- **PC 507**, the new stationary pump

"We are thrilled to participate in Intermat Paris 2024 - after sixt years - and to showcase our new milestones in innovation" said Davide Cipolla, CEO of CIFA. "As we commemorate 50 years of the mixer-pump – or as we call it "Magnum" - we reaffirm our commitment to driving sustainability and efficiency in the construction industry."

CIFA invites attendees to visit its booth **[HALL 6 - 6A064]** at Intermat Paris 2024 to explore its innovative products and learn more about its contributions to the low-carbon future of construction.

About CIFA

CIFA is an Italian leading manufacturer of concrete-working machinery and equipment with a consolidated presence in global markets, since 1928. CIFA has been part of the Chinese industrial group Zoomlion since 2008 and is an international company with sales and support networks all over the globe.
