

## **CIFA at Samoter 2026: Technological Advancements for Greater Reliability, Safety, and Productivity**

**Verona, May 6–9 – Hall 8, Stand F**

CIFA confirms its participation at Samoter 2026, the international trade fair dedicated to construction machinery, taking place in Verona from May 6 to 8. At Stand F – Hall 8, the company will showcase two solutions representing the latest technological evolution in the truck-mounted pump and truck mixer pump segments: the new 7-section K60H and the MK35H.

### **7-Section K60H: Compactness and Power Beyond 60 Meters**

The new K60H CARBOTECH sets a new benchmark in the 60+ meter pump segment. Designed to meet the demands of large-scale jobsites, it combines operational simplicity, flexibility, and high performance in complex working environments.

Its innovative 7-section carbon fiber boom — with the last four sections made of composite material — provides a structure that is 25% lighter and more resistant, improving weight balance and long-term durability.

Compared to traditional six-section pumps in the same category, the K60H offers:

- Greater compactness and superior maneuverability, thanks to an overall length of just 13,560 mm
- Pump opening height under 10 meters (–32% compared to market alternatives)
- Up to 20% more vertical reach thanks to the seventh section
- A 180 m<sup>3</sup>/h pumping unit to reduce pumping time and operating costs

The result is a machine engineered to maximize productivity and Total Cost of Ownership while ensuring precision and operational safety.

### **MK35H: The Compact High-Performance Truck Mixer Pump**

Alongside the 7-section K60H, CIFA will present the MK35H truck mixer pump, a solution that integrates a mixer and pump into a single compact machine, designed to deliver flexibility in urban jobsites and in applications requiring rapid deployment.

#### **About CIFA**

CIFA is an Italian leading manufacturer of concrete-working machinery and equipment with a consolidated presence in global markets, since 1928. CIFA has been part of the Chinese industrial group Zoomlion since 2008 and is an international company with sales and support networks all over the globe. For further information, visit the website [www.cifa.com](http://www.cifa.com)

#### **CIFA SpA**

With a 35-meter boom and a configuration optimized to balance transport capacity and pumping performance, the MK35H effectively meets the need for mobility, autonomy, and reduced operational time. The integration of the mixing unit and pumping system allows concrete to be managed directly on site, minimizing logistics steps and increasing overall efficiency.

### **CIFA Engineering Serving the Jobsite**

CIFA's presence at Samoter provides an opportunity to engage with operators, contractors, and industry professionals, highlighting solutions developed to address the evolving challenges of modern construction: complex jobsites, cost optimization, operational sustainability, and safety.

From the 60+ meter segment to integrated and compact solutions, CIFA brings advanced engineering and technology to the exhibition, reaffirming its position as a key international player in the concrete machinery sector.
