

## CIFA MK35H: efficiency and versatility in a compact, integrated solution

CIFA, a global leader in the design and manufacturing of equipment for the production, transport, and placement of concrete, offers the [MK35H](#) as an advanced solution in the truck mixer pump segment, designed to meet the operational needs of modern jobsites.

The MK35H combines a mixer and a pump in a single machine, providing an integrated system that helps optimize time, resources, and on-site logistics. It is a solution developed to improve operational efficiency, especially in urban environments or applications where flexibility and speed are essential.

### A balance of compactness and performance

Equipped with a **9 m<sup>3</sup> drum** and a **35-meter, four-section boom**, the MK35H ensures an optimal balance between transport capacity and pumping performance.

Its compact configuration allows easier access even in confined spaces, reducing setup time and improving overall jobsite operations.

### Carbon fiber technology

The use of **carbon fiber in the boom** is one of the MK35H's key distinguishing features. This solution provides a lighter and more resistant structure compared to traditional materials, improving machine balance and reducing wear over time.

These benefits translate into longer component lifespan and lower operating costs, enhancing overall productivity.

### Reliability and operational continuity

The MK35H is equipped with the **PB908 pumping unit**, designed to ensure consistent performance and long-term reliability. With a pumping capacity of up to **90 m<sup>3</sup>/h**, the machine supports a wide range of applications while maintaining operational continuity even in demanding conditions.

### Control and ease of use

#### Informazioni su CIFA

CIFA è un produttore di macchinari e attrezzature per il calcestruzzo, leader nel mercato italiano e uno dei principali attori a livello globale. Parte del gruppo industriale cinese Zoomlion dal 2008, CIFA è un'azienda altamente internazionale con reti di vendita e supporto in tutti i continenti e in grado di offrire ai clienti non solo una gamma di prodotti affidabili e di qualità, ma anche un supporto finanziario tramite Zoomlion Capital Financial Services. Per ulteriori informazioni, consultare il sito web all'indirizzo [www.cifa.com](http://www.cifa.com)

#### CIFA SpA

[communication@cifa.com](mailto:communication@cifa.com) – [mariarosaria.giordano@cifa.com](mailto:mariarosaria.giordano@cifa.com)

The **Easytronic control system**, combined with remote control, offers intuitive and precise operation. This approach simplifies machine handling, enhances safety, and reduces training time for operators.

### **Optimized jobsite processes**

One of the main advantages of the MK35H is its ability to streamline concrete handling processes thanks to the integration of mixing and pumping functions.

This configuration allows operators to:

- reduce logistical steps
- optimize working time
- increase jobsite autonomy

The result is a smoother workflow and improved overall productivity.

### **A solution for modern construction**

The MK35H fits seamlessly into CIFA's range as a practical response to the evolving needs of the construction industry, where flexibility, reliability, and cost optimization are increasingly critical.

A machine designed to support contractors in their daily operations, delivering high performance within a compact and versatile configuration.
